WORK EXPERIENCE

Elliot systems Pvt Ltd

DevOps Engineer Trainee

Aug 2025 - Present

- Deployed and managed multi-container applications using Docker and Docker Compose on AWS EC2, orchestrating services including PostgreSQL, Redis, Neo4j, and Celery for production environments.
- Built CI/CD pipelines with GitHub Actions for automated deployments, configured Nginx reverse proxy with path-based routing and SSL/HTTPS via Let's Encrypt.
- Configured AWS ECR for private image registry, Secrets Manager for credential management, IAM for access control, and Elastic IP with custom DNS for domain mapping.
- Managed multi-repo staging and production deployments on EC2 with environment-specific secret injection, CloudWatch monitoring, and zero-downtime release workflows.

EDUCATION

Marathwada Mitra Mandal's Institute of Technology, Lohegaon Pune

B.E (AI&DS) - 8.00 CGPA

June 2021 - June 2025

Kasturba Gandhi Junior College, Ahmedpur

12 th(Computer Science) - 88.83%

June 2019 - March 2021

PROJECTS

AI Platform Deployment on AWS

- Deployed a full-stack AI application on AWS EC2 using Docker Compose, orchestrating 7 containers including FastAPI, PostgreSQL, Redis, Neo4j, and Qdrant.
- Configured Nginx reverse proxy with HTTPS via Let's Encrypt for secure production access on a custom domain.
- Integrated AWS Secrets Manager for secure environment variable management across services.
- Built GitHub Actions CI/CD pipeline for automated deployment on every push to the staging branch.

Enterprise Multi-Service Deployment Platform

- Deployed and managed multiple services on AWS EC2 using Nginx path-based routing.
- Configured AWS Secrets Manager for secure credential management.
- Automated staging and production deployments using GitHub Actions CI/CD.
- Resolved Redis issues and implemented security fixes following VAPT recommendations.

SKILLS

Cloud & Infrastructure: AWS EC2, S3, IAM, Lambda, API Gateway, CloudWatch, CloudTrail, RDS, Secrets Manager, ECR, ECS, ALB, CloudFormation

DevOps & CI/CD: Docker, Docker Compose, Terraform, Kubernetes, Ansible, GitHub Actions, AWS CodePipeline

Web Server & Networking: Nginx, Reverse Proxy, SSL/TLS, Let's Encrypt, DNS Management

Monitoring & Observability: CloudWatch, CloudTrail, Prometheus, Grafana

Security: AWS Secrets Manager, IAM Roles, VAPT, Security Groups

Version Control: Git, GitHub

Programming Language: Python, Bash

API & Deployment: FastAPI, REST APIs

Databases: PostgreSQL, MySQL, Redis

Development Tools: VS Code, Jupyter Notebook
